-i- FUNCTION: INVOLVED IN DNA DOUBLE-STRAND BREAK REPAIR (DSBR). THE RADSO/AMREII COMPLEX POSSESSES SINGLE-STRAND ENDONUCLEASE ACTIVITY AND ATP-DEPENDENT DOUBLE-STRAND-SPECIFIC EXONUCLEASE ACTIVITY. RADSO PROVIDES AN ATP-DEPENDENT CONTROL OF MREII BY UNWINDING AND/OR REPOSITIONING DAN BEDOSITIONING BADDS INTO THE MREII ACTIVE SITE.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     PFNLKIRANELDVLKKLVFGYRKPLDNIKDNVGKMEDYIKKNKKTIENINELIEESKKTI 263

-!- FUNCTION: Involved in DNA double-strand break repair (DSBR). The
rad50/mre11 complex possesses single-strand endonuclease activity
and ATP-dependent double-strand-specific exonuclease activity.
Rad50 provides an ATP-dependent control of mre11 by unwinding
and/or repositioning DNA ends into the mre11 active site (By
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Probom; PD000006; ABC_transportr; 1.
